QXP

PLAN. TEACH. REPORT.

THE SCHOOL OPERATIONS SUITE

From curriculum to report card — without chaos.

QXP connects planning, teaching, attendance, assessment, reporting and parent visibility in one system, for schools running CBC/CBE and 8-4-4 in Kenya and East Africa. One place, one record, one system.

The report card is not typed. It is generated.

This is the whole argument, and it is the thing to watch in a demo. Every step below feeds the next, so the end-of-term assembly work simply does not happen.

01
Scheme of work
Built from the KICD strand structure. Not a document you file and forget.

→

02
Lesson plan
Inherits the strand from the scheme. Attached to the timetable slot it belongs to.

→

03
Assessment
Marked against the official CBE performance levels — EE1 down to BE2, the real ones.

→

04
Report card
Generated from those marks. Nobody re-types anything. HOD reviews, principal approves.

Modules across four packages.

Core, Plus, Whole School and Complete each include the one before it. Nothing is gated inside a package, and nothing is locked away to unlock later.

Academics
Schemes of work, lesson plans, timetable-linked delivery, record of work.

Assessment & Grading
Formative and summative, against official CBE rubric codes.

Reporting
Report cards generated from live assessment. Multi-step approval workflow.

Attendance
Daily roll call and lesson-level registers, linked to the timetable.

Parent Portal
Attendance, grades, report cards, announcements. Parents are never billed.

Analytics
A dashboard per role — from the board's campus comparison to a teacher's class.

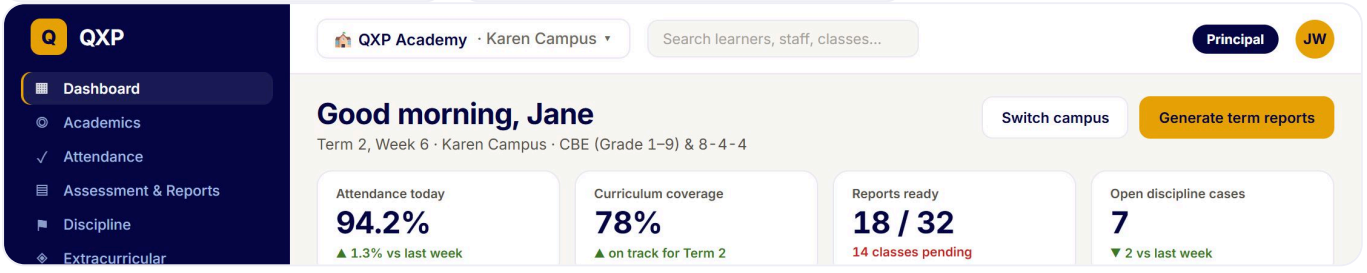

Communication
Announcements, and a realtime teacher-parent diary on the learner's record.

Discipline
Merit and demerit with severity, and repeat patterns surfaced automatically.

Extra-curricular
Clubs, sport and fixtures, with per-event parental consent tracked.

Admissions
Applications, documents, offers and enrolment — with capacity visible.

Wellbeing
Safeguarding, counselling referrals, IEP support, nurse and medical records.

The principal's view. Illustrative sample data — fictional learners, no real PII.

QXP

PLAN. TEACH. REPORT.

Four packages. Each includes the one before it.

FROM

KES 499

per user, per term

Parents are free. Always.

- ✓ Core, KES 499: the teaching chain, from scheme of work to report card.
- ✓ Plus, KES 749: adds discipline, library, the sick bay, the duty rota and admissions.
- ✓ Whole School, KES 999: adds clubs, 360 Awards, fee billing and optional boarding, same price (recommended).
- ✓ Complete, KES 1,149: adds the books, HR and payroll (on Core or Plus: KES 149 per learner + 450 per staff).
- ✓ Per learner or staff member; PARENTS ARE FREE. VAT in; 15% off a year paid ahead.

We invoice you; you pay by M-Pesa Paybill 4023743, PesaLink, or NCBA bank transfer, using the invoice number as the reference. (Collecting your own school fees is in Whole School — see overleaf.)

Live in three days.

A structured sequence, not an open-ended project. Multi-campus groups take longer.

DAY 1

Structure

Your tenant, campuses, levels, streams and classes.

DAY 2

Your data

Learners, staff and the timetable, imported and validated.

DAY 3

Teaching

Teacher training, and the first attendance register marked in QXP.

Before you book a demo.

Two questions schools ask us before they sign. Here are the straight answers, so nobody spends half an hour finding out the hard way.

School fees

Yes. Fee structures, invoicing, receipting, statements and arrears, with M-Pesa collection and reconciliation through your school's own shortcode, are in Whole School. Complete adds the ledger, HR and payroll; on Core or Plus they are an add-on.

WHAT YOU GET INSTEAD

The academic chain end to end - scheme of work to report card - and the money on the same learner record.

WhatsApp and SMS to parents

Both send, and neither is priced. WhatsApp uses your own Meta Business account and approved template. SMS goes out on our Africa's Talking account today; per-school accounts are not wired up yet. Both opt-in; a parent can reply STOP.

WHAT YOU GET INSTEAD

The in-platform diary - threaded, sitting on the learner's own record, and impossible to lose in a group of 200 - plus push notifications.

See it on a seeded school.

Thirty minutes, and we will walk the chain from a scheme of work to a printed report card.
